Journal of
# Computational Chemistry

**Volume Contents**
**Volume 16, 1995**
**Issue 1, January 1995**

An Application of the Miertus-Scrocco-Tomasi Solvation Model in Molecular Mechanics and Dynamics Simulations 1
*A. A. Varnek, G. Wipff, A. S. Glebov, and D. Feil*

On the Evaluation of the Solvent Polarization Apparent Charges in the Polarizable Continuum Model: A New Formulation 20
*Elena L. Coitiño, Jacopo Tomasi, and Roberto Cammi*

Propella[$3_4$]Prismane and Its Congeners: A MO-Theoretical Study 31
*Rolf Gleiter, Karl-Heinz Pfeifer, and Wolfram Koch*

Implementation of Reaction Field Methods in Quantum Chemistry Computer Codes 37
*A. H. de Vries, P. Th. van Duijnen, A. H. Juffer, J. A. C. Rullmann, J. P. Dijkman, H. Merenga, and B. T. Thole*

Force Field Parameters for Sulfates and Sulfamates Based on *Ab Initio* Calculations: Extensions of AMBER and CHARMm Fields 56
*Cornelis J. M. Huige and Cornelis Altona*

Geometric Molecular Similarity from Volume-Based Distance Minimization: Application to Saxitoxin and Tetrodotoxin 80
*Michel Petitjean*

Implementation of a Parallel Direct SCF Algorithm on Distributed Memory Computers 91
*Thomas R. Furlani and Harry F. King*

Path Integral Molecular Dynamics Methods: Application to Neon 105
*Juan J. Morales and María J. Nuevo*

An Examination of a Density Functional/Molecular Mechanical Coupled Potential 113
*Robert V. Stanton, David S. Hartsough, and Kenneth M. Merz Jr.*

Announcement 129

Errata 130

Diskette Submission Instructions I

**Issue 2, February 1995**

Atomic Radii Scales and Electron Properties Deduced from the Charge Density 133
*L. Fernández Pacios*

*Ab Initio* SCF Calculations on Low-Energy Conformers of Cyclohexaglycine 146
*Hans-Joachim Böhm and Stefan Brode*

Geometry-Dependent Atomic Charges: Methodology and Application to Alkanes, Aldehydes, Ketones, and Amides 154
*U. Dinur and A. T. Hagler*

Poling: Promoting Conformational Variation 171
*Andrew Smellie, Steven L. Teig, and Peter Towbin*

A Vibrational Molecular Force Field of Model Compounds with Biological Interest. IV. Parameters for the Different Glycosidic Linkages of Oligosaccharides 188
*Manuel Dauchez, Philippe Derreumaux, Philippe Lagant, and Gérard Vergoten*

Solving the Finite-Difference, Nonlinear, Poisson–Boltzmann Equation under a Linear Approach 200
*Xiang Zhexin, Shi Yunyu, and Xu Yinwu*

Is the Stereomutation of Methane Possible? 207
*Melanie J. M. Pepper, Isaiah Shavitt, Paul von Ragué Schleyer, Mikhail N. Glukhovtsev, Rudolf Janoschek, and Martin Quack*

Parallel Implementation of a Mesh-Based Density Functional Electronic Structure Code 226
*Y. S. Li, M. C. Wrinn, J. M. Newsam, and M. P. Sears*

Monte Carlo Study of Lipid Membranes: Simulation of Diparmitoyl-phosphatidylcholine Bilayers in Gel and Liquid-Crystalline Phases 235
*Tooru Taga and Kazuhumi Masuda*

A Molecular Mechanical Model That Reproduces the Relative Energies for Chair and Twist-Boat Conformations of 1,3-Dioxanes 243
*Allison E. Howard, Piotr Cieplak, and Peter A. Kollman*

Diskette Submission Instructions I

**Issue 3, March 1995**

The Geometry of Pyrazole: A Test for *Ab Initio* Calculations 263
*Antonio L. Llamas-Saiz, Concepción Foces-Foces, Otilia Mó, Manuel Yáñez, Eric Elguero, and José Elguero*

The Double Cubic Lattice Method: Efficient Approaches to Numerical Integration of Surface Area and Volume and to Dot Surface Contouring of Molecular Assemblies 273
*Frank Eisenhaber, Philip Lijnzaad, Patrick Argos, Chris Sander, and Michael Scharf*

Evaluation of Moment Statistics for Molecular Modeling 285
*Kenny B. Lipkowitz and Michael A. Peterson*

Conformational Analysis and Flexibility of Carbohydrates Using the CICADA Approach with MM3 296
*Jaroslav Koča, Serge Pérez, and Anne Imberty*

Generalized Alteration of Structure and Parameters: A New Method for Free-Energy Perturbations in Systems Containing Flexible Degrees of Freedom 311
*Daniel L. Severance, Jonathan W. Essex, and William L. Jorgensen*

Small-Amplitude Protein Conformational Dynamics: Second-Order Analytic Relation between Cartesian Coordinates and Dihedral Angles 328
*Shinji Sunada and Nobuhiro Go*

Numerical Solution of the Nonlinear Poisson–Boltzmann Equation: Developing More Robust and Efficient Methods 337
*Michael J. Holst and Faisal Saied*

Symplectic Integrators and the Conservation of Angular Momentum 365
*Mei-Qing Zhang and Robert D. Skeel*

An Efficient Simulation Technique for Electrostatic Free Energies with Applications to Azurin 370
*Bo Svensson and Bo Jönsson*

An Application of the Reaction Field Theory to Hydrated Metal Cations in the Framework of the MNDO, AM1, and PM3 Methods 378
*Takao Furuki, Minoru Sakurai, and Yoshio Inoue*

*Ab Initio* Calculation of Molar Volumes: Comparison with Experiment and Use in Solvation Models 385
*Ming Wah Wong, Kenneth B. Wiberg, and Michael J. Frisch*

Diskette Submission Instructions I

**Issue 4, April 1995**

Parallel Computation of the MP2 Energy on Distributed Memory Computers 395
*Antonio M. Márquez and Michel Dupuis*

SINDO1 Study of the Photoreaction of Tetramethylene Sulfone 405
*Heiko Gerwens and Karl Jug*

Fast, Fuzzy C-Means Clustering of Data Sets with Many Features 414
*Bjørn K. Alsberg*

Improved Methods for Semiempirical Solvation Models 422
*Daniel A. Liotard, Gregory D. Hawkins, Gillian C. Lynch, Christopher J. Cramer, and Donald G. Truhlar*

The Extended Law of Corresponding States and the Intermolecular Potentials for He—He and Ne—Ne 441
*H. Behnejad, A. Maghari, and M. Najafi*

Calculation of Binding Energy Differences for Receptor–Ligand Systems Using the Poisson-Boltzmann Method 445
*Jian Shen and Florante A. Quiocho*

Prediction of LUMO Energy and Rate Constant by Comparative Molecular Field Analysis (CoMFA) 449
*Sung-Eun Yoo and Ok Ja Cha*

A Molecular Mechanics/Grid Method for Evaluation of Ligand–Receptor Interactions 454
*Brock A. Luty, Zelda R. Wasserman, Pieter F. W. Stouten, C. Nicholas Hodge, Martin Zacharias, and J. Andrew McCammon*

Theoretical Investigation of the Relative Stabilities of XSSX and $X_2SS$ Isomers (X = F, C1, H, and $CH_3$) 465
*F. Matthias Bickelhaupt, Miquel Solà, and Paul von Ragué Schleyer*

Determination of C-Terminal Structure of Human C—Ha—Ras Oncogenic Protein 478
*Jeong Hyeok Yoon, Jae Kwang Shin, and Mu Shik Jhon*

Intervals and the Deduction of Drug Binding Site Models 486
*Gordon M. Crippen*

Parameterization and Evaluation of a Flexible Water Model 501
*David M. Ferguson*

Calculating the Electric Potential of Macromolecules: A Simple Method for Molecular Surface Triangulation 512
*Xiang Zhexin, Shi Yunyu, and Xu Yingwu*

Analytical Approach to Very Large Benzenoid Polymers 517
*T. Živković, M. Randić, D. J. Klein, H.-Y. Zhu, and N. Trinajstić*

Diskette Submission Instructions I

**Issue 5, May 1995**

Force and Virial of Torsional-Angle-Dependent Potentials 527
*H. Bekker, H. J. C. Berendsen, and W. F. van Gunsteren*

The Exponents Method for Calculating Equilibrium Concentrations of Complex Species in Solution 534
*Frederico F. Campos and John S. Rollett*

Uncoupled Hartree–Fock Calculations of the Polarizability and Hyperpolarizabilities of Nitrophenols 545
*R. Bursi, M. Lankhorst, and D. Feil*

Development of Optimized MST/SCRF Methods for Semiempirical Calculations: The MNDO and PM3 Hamiltonians 563
*Modesto Orozco, M. Bachs, and F. J. Luque*

On the Accuracy of Density Functionals and Their Basis Set Dependence: An Extensive Study on the Main Group Homonuclear Diatomic Molecules $Li_2$ to $Br_2$ 576
*Roland H. Hertwig and Wolfram Koch*

INDO Parameters for the Elements of the I and II Transition Rows 586
*O. V. Sizova and V. I. Baranovski*

An Empirical Force Field. I. Alkanes 595
*Jan L. M. Dillen*

An Empirical Force Field. II. Crystalline Alkanes 610
*Jan L. M. Dillen*

Unusual Conformational-Determining Interactions in Oxymethylpyridines: An *Ab Initio* Study and an Improved Method for Refining Molecular Mechanics Parameters 620
*Per-Ola Norrby, Kenneth Wärnmark, Björn Åkermark, and Christina Moberg*

The Relaxation of Molecular Crystal Structures Using a Distributed Multipole Electrostatic Model 628
*D. J. Willock, S. L. Price, M. Leslie, and C. R. A. Catlow*

Conformational Memories and a Simulated Annealing Program That Learns: Application to $LTB_4$ 648
*Frank Guarnieri and Stephen R. Wilson*

Nonlocal Density Functional Calculation of Gas Phase Heats of Formation 654
*Dariush Habibollahzadeh, M. Edward Grice, Monica C. Concha, Jane S. Murray, and Peter Politzer*

Diskette Submission Instructions I

**Issue 6, June 1995**

Theoretical Study of the Gas-Phase Addition of HF and HCl to Ethylene: Analysis of the Catalytic Action of Dimeric Halides 659
*M. I. Menéndez, D. Suárez, J. A. Sordo, and T. L. Sordo*

Efficient Conformational Space Sampling for Nucleosides Using Internal Coordinate Monte Carlo Simulations and a Modified Furanose Description 667
*H. A. Gabb, R. Lavery, and C. Prévost*

A Simple Yet Accurate Boundary Element Method for Continuum Dielectric Calculations **681**
*Enrico O. Purisima and Shahul H. Nilar*

Potential Energy Function for Cation–Peptide Interactions: An *Ab Initio* Study **690**
*Benoît Roux and Martin Karplus*

The Role of the Carboxylate Ion in Models of Acyl-Chymotrypsin **705**
*Weida Tong and Valerian T. D'Souza*

Dynamic Load Balancing Algorithms for Replicated Data Molecular Dynamics **715**
*William S. Young and Charles L. Brooks III*

The True Diatomic Potential as a Perturbed Morse Function **723**
*Mounzer Dagher, Mounif Kobersi, and Hafez Kobeissi*

Genetic Algorithms: A Robust Scheme for Geometry Optimizations and Global Minimum Structure Problems **729**
*Jordi Mestres and Gustavo E. Scuseria*

An Analytical Algorithm for the Rapid Determination of the Solvent Accessibility of Points in a Three-Dimensional Lattice around a Solute Molecule **743**
*Tony You and Donald Bashford*

The Electronic Structure of Weakly Bound Systems. I. Rare-Gas Bimolecular Cations **758**
*Gustavo E. López*

The Electronic Structure of Weakly Bound Systems. II. $NeX^+$ and $ArX^+$ ($X=H_2O$, HCl, and HF) Bimolecular Cations **768**
*Gustavo E. López*

Comparison of Potential-Derived Charge and Atomic Multipole Models in Calculating Electrostatic Potentials and Energies of Some Nucleic Acid Bases and Pairs **777**
*James P. Ritchie and Ann S. Copenhaver*

Diskette Submission Instructions **I**

## Issue 7, July 1995

Accurate Modeling of the Intramolecular Electrostatic Energy of Proteins 791
*Michael J. Dudek and Jay W. Ponder*

An Improved Algorithm for the Analytical Computation of Solvent-Excluded Volume. The Treatment of Singularities in Solvent-Accessible Surface Area and Volume Functions 817
*Valentin Gogonea and Eiji Ōsawa*

Mono- and Poly-Ligated Complexes of $Zn^{2+}$: An *Ab Initio* Analysis of the Metal–Ligand Interaction Energy 843
*Nohad Gresh, Walter J. Stevens, and Morris Krauss*

Energetics of $Zn^{2+}$ Binding to a Series of Biologically Relevant Ligands: A Molecular Mechanics Investigation Grounded on *Ab Initio* Self-Consistent Field Supermolecular Computations 856
*Nohad Gresh*

Force Field Studies of Cholesterol and Cholesteryl Acetate Crystals and Cholesterol–Cholesterol Intermolecular Interactions 883
*Congxin Liang, Liqun Yan, Jörg-R. Hill, Carl S. Ewig, Terry R. Stouch, and Arnold T. Hagler*

The Fast Multipole Boundary Element Method for Molecular Electrostatics: An Optimal Approach for Large Systems 898
*Ranganathan Bharadwaj, Andreas Windemuth, S. Sridharan, Barry Honig, and Anthony Nicholls*

An Improved Molecular Modeling Method for the Prediction of Enantioselectivity 914
*J. Aerts*

Diskette Submission Instructions I

## Issue 8, August 1995

A New Optimization Technique for Artificial Neural Networks Applied to Prediction of Force Constants of Large Molecules 923
*Thomas H. Fischer, Wesley P. Petersen, and Hans Peter Lüthi*

An Improved Description of the Molecular Charge Density in Force Fields with Atomic Multipole Moments 937
*Uwe Koch and Ernst Egert*

The Molecular Structures and the Absorption Maxima of the H-Chromophores of the Indigoid Dyes 945
*P. C. Chen*

An Empirical Boundary Potential for Water Droplet Simulations 951
*Jonathan W. Essex and William L. Jorgensen*

Conformational Analysis of Jet-Cooled Tryptophan Analogs and Histamine Using the MM3(94) Force Field: Comparison with Experiment 973
*Mark Sulkes*

A Comprehensive Study of the Rotational Energy Profiles of Organic Systems by *Ab Initio* MO Theory, Forming a Basis for Peptide Torsional Parameters 984
*David S. Maxwell, Julian Tirado-Rives, and William L. Jorgensen*

Determination of Net Atomic Charges Using a Modified Partial Equalization of Orbital Electronegativity Method. IV. Application to Hypervalent Sulfur- and Phosphorus-Containing Molecules 1011
*Je Myung Park, Oh Young Kwon, Kyoung Tai No, Mu Shik Jhon, and Harold A. Scheraga*

Electrostatic Bonding Models: A Test on Group 1 and 2 Metal Complexes with $H_2O$, $NH_3$, $H_2S$, $PH_3$, and Related Ligands 1027
*Eric Magnusson*

A Rapid Method for Calculating Derivatives of Solvent Accessible Surface Areas of Molecules 1038
*S. Sridharan, Anthony Nicholls, and Kim A. Sharp*

*Ab Initio* Molecular Orbital Studies of Nonidentity Allyl Transfer Reactions 1045
*Ikchoon Lee, Chang Kon Kim, and Bon-Su Lee*

Diskette Submission Instructions I

## Issue 9, September 1995

On the Existence of $SH_3$, $SeH_3$, and $TeH_3$: Discrepancies between All-Electron and Pseudopotential Calculations **1055**
*Bruce A. Smart and Carl H. Schiesser*

A Density Functional Treatment of Organolithium Compounds: Comparison to *Ab Initio*, Semiempirical, and Experimental Results **1067**
*Lawrence M. Pratt and Ishrat M. Khan*

Molecular Dynamics Simulation with a Continuum Electrostatic Model of the Solvent **1081**
*Michael K. Gilson, J. Andrew McCammon, and Jeffry D. Madura*

Internal Motions of Carbohydrates as Probed by Comparative Molecular Modeling and Nuclear Magnetic Resonance of Ethyl $\beta$-Lactoside **1096**
*Søren Balling Engelsen, Serge Pérez, Isabelle Braccini, and Catherine Hervé du Penhoat*

Error Evaluation in the Design of a Special-Purpose Processor That Calculates Nonbonded Forces in Molecular Dynamics Simulations **1120**
*Takashi Amisaki, Takaji Fujiwara, Akihiro Kusumi, Hiroo Miyagawa, and Kunihiro Kitamura*

PVM-AMBER: A Parallel Implementation of the AMBER Molecular Mechanics Package for Workstation Clusters **1131**
*Eric Swanson and Terry P. Lybrand*

Evaluating Polarizable Potentials on Distributed Memory Parallel Computers: Program Development and Applications **1141**
*Dan N. Bernardo, Yanbo Ding, Karsten Krogh-Jespersen, and Ronald M. Levy*

Implementation of the ECEPP Algorithm, the Monte Carlo Minimization Method, and the Electrostatically Driven Monte Carlo Method on the Kendall Square Research KSR1 Computer **1153**
*D. R. Ripoll, M. S. Pottle, K. D. Gibson, H. A. Scheraga, and A. Liwo*

Hydrophobic Solvation of Methane and Nonbond Parameters of the TIP3P Water Model **1164**
*Yaxiong Sun and Peter A. Kollman*

IMOMM: A New Integrated *Ab Initio* + Molecular Mechanics Geometry Optimization Scheme of Equilibrium Structures and Transition States 1170
*Feliu Maseras and Keiji Morokuma*

Diskette Submission Instructions I

**Issue 10, October 1995**

Discrete, Dynamic Polymer Modeling: A Pseudo-Diatomic Model of Lignin 1181
*Marc R. Roussel and Carmay Lim*

Algorithms for Constrained Molecular Dynamics 1192
*Eric Barth, Krzysztof Kuczera, Benedict Leimkuhler, and Robert D. Skeel*

Flexible Ligand Docking without Parameter Adjustment across Four Ligand–Receptor Complexes 1210
*Kevin P. Clark and Ajay*

A Comparative Quantum Mechanical Study of Bond Separation Energies as a Measure of Cyclic Conjugation 1227
*D. B. Chesnut*

Toward Similarity Measures for Macromolecular Bodies: MEDLA Test Calculations for Substituted Benzene Systems 1238
*P. Duane Walker and Paul G. Mezey*

*Ab Initio* and Molecular Mechanics (MM2 and MM3) Calculations of Nonconjugated Positively Charged Nitrogen-Containing Compounds 1250
*Georgia B. McGaughey, Eugene L. Stewart, and J. Phillip Bowen*

*Ab Initio* Calculations of the Ultraviolet Resonance Raman Spectra of Uracil 1261
*Warner L. Peticolas and Thomas Rush III*

Reduced Variable Molecular Dynamics 1271
*James Turner, Paul Weiner, Barry Robson, Ravi Venugopal, Harry Schubele III, and Ramen Singh*

Approaches to Large-Scale Parallel Self-Consistent Field Calculations 1291
*Adrian T. Wong and Robert J. Harrison*

Parallel Direct Implementations of Second-Order Perturbation Theories 1301
*Ida M. B. Nielsen and Edward T. Seidl*

Diskette Submission Instructions I

**Issue 11, November 1995**

Density Functional Theory and Molecular Clusters 1315
*Pavel Hobza, Jiří Šponer, and Tomáš Reschel*

Analysis of the Updated Hessian Matrices for Locating Transition Structures 1326
*Josep Maria Bofill and Mónica Comajuan*

Multidimensional Free-Energy Calculations Using the Weighted Histogram Analysis Method 1339
*Shankar Kumar, John M. Rosenberg, Djamal Bouzida, Robert H. Swendsen, and Peter A. Kollman*

Gradient SHAKE: An Improved Method for Constrained Energy Minimization in Macromolecular Simulations 1351
*Yong Duan, Shankar Kumar, John M. Rosenberg, and Peter A. Kollman*

Application of the Multimolecule and Multiconformational RESP Methodology to Biopolymers: Charge Derivation for DNA, RNA, and Proteins 1357
*Piotr Cieplak, Wendy D. Cornell, Christopher Bayly, and Peter A. Kollman*

A Molecular Dynamics Study of the Inhibition of Chicken Dihydrofolate Reductase by a Phenyl Triazine 1378
*Andrew R. Leach and Teri E. Klein*

An Efficient Approach to Calculation of Zero-Flux Atomic Surfaces and Generation of Atomic Integration Data 1394
*Boris B. Stefanov and Jerzy Cioslowski*

Docking Flexible Molecules: A Case Study of Three Proteins 1405
*R. S. Judson, Y. T. Tan, E. Mori, C. Melius, E. P. Jaeger, A. M. Treasurywala, and A. Mathiowetz*

A Highly Portable Parallel Implementation of AMBER4 Using the Message Passing Interface Standard 1420
*James J. Vincent and Kenneth M. Merz, Jr.*

Effects of the Cutoff Center on the Mean Potential and Pair Distribution Functions in Liquid Water 1428
*Razif R. Gabdoulline and Chong Zheng*

Energy Minimization of Peptide Analogues Using Genetic Algorithms 1434
*Frank Herrmann and Sándor Suhai*

Erratum 1445

**Announcement** 1447

Diskette Submission Instructions I

**Issue 12, December 1995**

Remarks on the Use of the Apparent Surface Charges (ASC) Methods in Solvation Problems: Iterative versus Matrix-Inversion Procedures and the Renormalization of the Apparent Charges 1449
*R. Cammi and J. Tomasi*

Localization and Quantitative Evaluation of Potent Local Binding Sites on the Accessible Lennard–Jones Surface 1459
*Alexander A. Cohen and Shimon E. Shatzmiller*

Incorporating the Protein–Dipole Langevin–Dipole Model into Tanford-Kirkwood Theory 1468
*Xiang Zhexin, Huang Fuhua, Shi Yunyu, and Xu Yinwu*

Application of the Shape Group Method to Conformational Processes: Shape and Conjugation Changes in the Conformers of 2-Phenyl Pyrimidine 1474
*P. Duane Walker, Paul G. Mezey, Gerald M. Maggiora, Mark A. Johnson, and James D. Petke*

Calculation of Molecular Geometries, Relative Conformational Energies, Dipole Moments, and Molecular Electrostatic Potential Fitted Charges of Small Organic Molecules of Biochemical Interest by Density Functional Theory 1483
*Alain St.-Amant, Wendy D. Cornell, Peter A. Kollman, and Thomas A. Halgren*

Numerical Evaluation of Three- and Four-Center Bielectronic Integrals Using Exponential-Type Atomic Orbitals 1507
*J. C. Cesco, C. C. Denner, A. E. Rosso, J. E. Perez, F. S. Ortiz, R. H. Contreras, C. G. Giribet, and M. C. Ruiz de Azúa*

Calculation of Relative Free Energy Differences for the Covalent Hydration of Organic Compounds: A Combined Quantum Mechanical and Free Energy Perturbation Study 1513
*Mark D. Erion and M. Rami Reddy*

Harmonic Analysis of Large Systems. I. Methodology 1522
*Bernard R. Brooks, Dušanka Janežič, and Martin Karplus*

Harmonic Analysis of Large Systems. II. Comparison of Different Protein Models 1543
*Dušanka Janežič and Bernard R. Brooks*

Harmonic Analysis of Large Systems. III. Comparison with Molecular Dynamics 1554
*Dušanka Janežič, Richard M. Venable, and Bernard R. Brooks*
